ASSET MANAGEMENT SERVICES
WITH **SOLGUARD**

TOTAL MAINTENANCE AND CARE FOR YOUR SOLAR PHOTOVOLTAIC PORTFOLIO.

With **SolGuard**, we will act as your PV System's engineer, provide independent reviews and validation of system performances, monthly reporting, coordinate recommended O&M needs, review annual performance and O&M operations when needed.

PERFORMANCE | SIMPLIFIED

SERVICES OVERVIEW

Whether you need a full design-build approach or just construction services, Sustineo operates a flexible business model that self-performs all aspects of a solar, electrical, or general contracting project. We are licensed to contract throughout California. Our design-build process can help lower total project costs and deliver superior results no matter what project type.

One entity, one contract, one holistic approach from initial concept to final sign off provides less stress for you and your team. Design-build is a dynamic alternative for any company wishing to complete projects faster and more accurately.

MAINTENANCE | SIMPLIFIED

OUR DIFFERENTIATORS AND EXPERTISE

MONTHLY AND ANNUAL REPORTING

- **SOLEYE™** is the monitoring system within the **SolGuard** maintenance package.
- Manage the Web Portal through the DAS and have an early response to alarms issued.
- Review data and compile monthly reports to be sent to our customer.

SAFETY

- Highly trained and organized team with over 50 Years of experience.
- All Members are OSHA Certified.
- Rooftop/Canopy Inspections are completed with correct safety standards in place.

COORDINATE O&M NEEDS

Our experienced team will respond to unscheduled maintenance service or be on call. We work with your schedule to **reduce energy losses** during needed maintenance.

We also offer **washing services** for degraded systems and preventative maintenance scheduling is available during/after fire seasons.

MAINTAIN PEAK PERFORMANCE

- General Condition and Inspection - 2x Per Year
- Racking & Carport Conditions - 1x Per Year
- Intermodule Wiring & Conditions - 1x Per Year
- Electrical Tests and Measurements - 1x Per Year
- Weather Station & DAS - 1x Per Diem

DRONE AND THERMAL IMAGING

Drone Infrared imaging allows a full inspection of arrays – notifying Sustineo of any potential issues.

Inspection services include the overall Array, Tie-In's & Inverter, Combiner Boxes & Junction Boxes (if applicable).

TOTAL PROJECTS:
859

DESIGNED & INTERCONNECTED:
152 MW

UNDER ASSET MANAGEMENT:
21 MW

UNDER O&M:
17 MW
